

# Last Call™

## CRABGRASS CONTROL THAT WORKS ON YOUR SCHEDULE

Last Call™ is a proprietary, patent-pending formulation of fenoxaprop, fluroxypyr and dicamba for strong control of crabgrass, including the mid-tiller growth stage. Plus, Last Call controls more than 40 other grassy and broadleaf weeds and is labeled for most managed areas in ornamental, athletic, and golf turf.

## CONTROL MORE THAN CRABGRASS

Last Call knocks out more than 40 grassy and broadleaf weeds in cool-season turf and zoysiagrass.

SUCH AS

- dandelion • foxtail • goosegrass • Japanese stiltgrass • lambsquarters • lespedeza • oxalis • purslane • ragweed • thistle • white clover •

Lansing, MI | 1.5 fl oz/1,000 sq ft | Applied July | 7 DAT

## REMOVE BERMUDA

Selectively remove Bermudagrass from cool-season turf species including Kentucky bluegrass, perennial ryegrass, tall fescue, fine fescue and zoysiagrass.

## SAVE MONEY

ONE PRODUCT  
DOES IT ALL

Last Call covers more acres and controls more weeds.

Reduce tank mixes, reduce time, and reduce non-performance complaints.

## LOWER RATES

USE LESS,  
TREAT MORE

Last Call is labeled at low use rates, 1.5 fl oz/1,000 sq ft (64 fl oz/A).

That's just half the rate, or twice the acres, of most quinclorac-based herbicides.
