GREEN KYLLINGA CONTROL

S. Askew, Virginia Tech University, 2015

Last Call™ is formulated for outstanding crabgrass control at most any growth stage - giving you the widest, most flexible application window. Plus, Last Call controls more than 40 other grassy and broadleaf weeds in cool-season turf and zoysiagrass. Last Call is labeled at low use rates, 1.5 fl oz/1,000 sq ft (64 fl oz/A). That's just half the rate of many herbicides.

Celero® is a selective, post-emergence herbicide for control of sedges including kyllinga in established turfgrass. Celero translocates down to the roots to deliver superior sedge control in both cool- and warm-season turf. Use Celero as a broadcast or spot treatment.

Quincept® offers the perfect balance of power and performance to control both annual grass, including crabgrass, and broadleaf weeds.

TERMS AND CONDITIONS

* Rebates are in the form of distributor credits, credits available after September 30, 2017. All purchases must be made from an authorized Nufarm distributor, confirmed by the distributor and reported in the end user EDI. Reward calculations will be done at the sole discretion of Nufarm. This offer is not available to Nufarm distributors, dealers or retailers. Nufarm reserves the right to audit, change or terminate this program or pricing at any time without notification. Nufarm also reserves the right to verify customer qualifications and claims for reward payments (verification may delay payments). **Product purchases must be made and registered between May 1, 2017 and August 15, 2017.**
